BUSINESS CLOUD READINESS SERVICE

"

"80% of cloud adopters saw improvements within 6 months of moving to the cloud"

Pulsant's Business Cloud Readiness Service evaluates your business' readiness for cloud adoption by providing you with a high-level assessment of the current state of your technology environment. Each assessment is designed around your individual business' needs and at Pulsant we work closely with you in order to provide a comprehensive and value-added cloud adoption strategy. From assessing the alignment of your IT and business strategies, through to an executive report detailing observations, considerations and recommendations, Pulsant's Business Cloud Readiness Service provides low risk, easy adoption recommendations for businesses considering the move to cloud-based services. With over twenty years' consultancy experience out in the field, we have developed a Cloud Readiness Service that will provide your business with a cost-optimised technology infrastructure, reducing capital expenditure and effectively lowering your IT budgets. This results in a reduction of development costs, improved security, resiliency and time to market.

Pulsant
Business Unlimited

Value Proposition

By drawing on the experiences of Pulsant's world-class technology professionals and by utilising independent industry research, we provide a rapid assessment of Business and IT readiness to adopt Cloud based services. Post-assessment, we drive better alignment between the business and IT, ensuring that a cohesive cloud adoption strategy is produced and offers the business maximum value at the best commercial price points. By adopting this structured management framework approach, Pulsant delivers rigour in the decision making process; driving greater governance, improving visibility of cost and risk, and supporting the development of a migration strategy that suits your business.

Capabilities

Pulsant provides specialist technical and business advisory management expertise. We have developed our own intellectual capital built from independent research, previous client engagements and years of real world delivery experience. Our Service packages together the necessary information and expertise required to guide your business through the transition of adopting cloud based services, with our knowledge available to clearly lead you through each aspect of the important decision-making process. Going forward, we also offer the opportunity to build a cohesive strategy based on the readiness assessment recommendations. Our range of competencies include: Consulting, IT leadership, IT economics, technical analysis, service maturity assessments, program and project governance, business case creation, planning, execution and reporting.

Outcomes

Industry research has identified that the traditional way businesses consume IT services is rapidly changing with the number of different cloud services and products to choose from is ever-increasing. The quantum shift from Capital Expenditure (Capex) to Operating Expenditure (Opex) models is accelerating and business leaders are faced with the challenge of building the right Cloud strategy in line with changing business demand and requirements. Businesses are demanding a flexible, highly skilled and effective Hybrid IT services strategy which delivers change in a controlled way, while maintaining and potentially enhancing productivity and competitive advantage. Pulsant's Cloud Readiness Service enables your business to make informed decisions surrounding cloud adoption, providing you with the building blocks to develop a technology strategy that supports the business goals. Our Service is custom-designed to match your requirements and we will partner with you to recommend a cloud adoption strategy that is right for your business.
