

## EDINBURGH NEWBRIDGE DATA CENTRE

### Why Pulsant?

Pulsant colocation provides a secure, reliable and more cost-effective way to ensure your infrastructure remains resilient, scalable and highly available. As the largest regional data centre provider in the UK, all data centres are strategically located, fully connected and cloud-ready, enabling you to take advantage of the same connections as a London data centre, with local benefits.

### Why Edinburgh Newbridge?

One of three Pulsant sites in Scotland's data centre capital, our purpose-built Newbridge facility is located to the west of the city centre. Acting as a satellite centre to our South Gyle facility, Newbridge is a stone's throw from Edinburgh Airport. This facility is also easily accessible by road and rail and is pre-built and pre-configured for the rapid installation of your hardware, whether you require a single rack or a dedicated private suite.

### Highlights

- 0.5MW across 7 data halls
- 24 x 7 environmental monitoring
- 24 X 7 manned security & smart hands
- Carrier neutral with connectivity options to South Gyle

### LOCATION
